Part B - Procedures

Use of Internal Mailing Lists

(5) Internal Bulk Email sent through VU Internal Mailing Lists is used to facilitate effective communication throughout the University and should be used only for official Victoria University business.

(6) Internal Bulk Email must not be used to communicate any activity that is illegal under state, federal or international law, advertisements of a personal nature, announcements that have no direct relevance to the University, items of a frivolous nature or any matter which would breach any University policy.

(7) University mailing lists are to be used only for the purpose for which they were created as outlined in Part C of this procedure.

(8) Email messages sent to the University Broadcast Groups and Urgent Campus Broadcast Groups are only accepted from within the VU network; as such they need to be sent using the sender's own account on the University's email system.

(9) In order to facilitate effective communication, messages must have a subject line that is relevant to the content of the message and clearly indicates what the message is about. Where possible, this should also contain information regarding the target audience if it is not likely to be of interest to the entire readership of the list to which it is sent.

(10) Emails sent via VU Internal Mailing Lists must conform to the [IT Appropriate Use Policy](#) and [IT Appropriate Use - Email Procedure](#).

Request for new Internal Mailing Lists

(11) Requests for a new internal mailing list can be made by providing IT Customer Support with the following information:
